**Statement**: Only a few percent of college graduates have a job that is related to their major while mostly are working in those fields which do not require their specialization. Also, th graduate employees do not earn much more than the average non-college graduate employees. Thus, college students are actually wasting their parents' money.

Which of the following, if true, most weakens the above argument?

- College graduates prefer to work at a lower salary rather than to be unemployed.
- Parents of college graduates have more debts than the parents of non-college graduates.
- Very few college graduates agree that they regret going to college.
- College graduates are preferred over the non-college graduates for jobs.

QUESTION 15 GROUP Reasoning Ability SECTION Logical Reasoning
Directions: Study the information given below and answer the questions that follow.
A household has six cars—Swift, WagonR, Santro, i20, Alto and Eon. Each car is painted a different colour: Red, Blue, Green, Yellow, White or Black. Each car runs on either Petrol or Diesel.
Neither Swift nor WagonR is White or Red, and exactly one of them runs on Petrol.
WagonR is not Green, while Santro is Blue.
Alto is neither White nor does it run on Petrol.
Eon is Yellow and runs on Diesel.
An equal number of cars run on Petrol and Diesel.
Question:
The white coloured car is?
Alto
i20
Swift
WagonR
