What role does the 'angle of internal friction' play in soil mechanics?

Answer

- It indicates the color variation of the soil
- It determines the soil's ability to absorb water
- It is a measure of the electrical conductivity of the soil
- It represents the shear strength of soil under dry conditions

2022ume1200@mnit.ac.in

Question 21.

Total Marks: 2

Which of the following is not ferromagnetic

Answer

- Cast Iron
- Wrought Iron
- Austenitic stainless steel
- Martensitic stainless steel

2022ume1200@mnit.ac.in

Question 8.

Total Marks: 2

Heat addition at constant volume is known as a

Answer

- Isothermal process
- Isochoric process
- isobaric process
- Isentropic process

2022ume1200@mnit.ac.in

Question 30.

Total Marks: 4

Waste water is help up in an open drain pit (of depth 10m) at a temperature of 50 degC . Vapour pressure of waste water at this temperature if 0.2 bar A . The frictional losses in suction pipe is about 0.1 bar A. The maximum depth of pit from which any pump can pump out this waste water is around

Answer

- Equal to atmospheric pressure , i.e 10m
- 3m
- 9m
- 7m

2022ume1200@mnit.ac.in

Question 19.

Total Marks: 2

In abrasive jet machining, as the distance between the nozzle tip and the work surface increases, the material removal rate

Answer

- increases continuously.
- decreases continuously
- decreases, becomes stable and then increases
- increases, becomes stable and then decreases.

2022ume1200@mnit.ac.in

Question 18.

Total Marks: 2

In a linearly hardening plastic material , the true stress beyond initial yielding

Answer

- ○ increases linearly with true strain
- ○ decreases linearly with true strain
- ○ Remains constant
- ○ first increases linearly and then decreases linearly with true strain

2022ume1200@mnit.ac.in

Question 25.

Total Marks: 2

Consider an incompressible laminar flow of a constant property Newtonian fluid in an isothermal circular tube. The flow is steady with fully developed velocity and temperature profiles. The Nusselt number for this flow depends on

Answer

- ○ Reynolds Number
- ○ Prandtl Number
- ✓ Neither Reynolds nor Prandtl Number
- ○ Both reynolds and Prandtl No:

2022ume1200@mnit.ac.in

Question 37.

Total Marks: 4

A shaft has an attached disc at the centre of its length. The disc has its centre of gravity located at a distance of 2 mm from the axis of the shaft. When the shaft is allowed to vibrate in its natural bow-shaped mode, it has a frequency of vibration of 10 rad/s. When the shaft is rotated at 300 r.p.m., it will whirl with a radius of

Answer

- 2.22 mm
- 2.50 mm
- 3.0 mm
- 2 mm

2022ume1200@mnit.ac.in

Question 23.

Total Marks: 2

Which is true for Aluminium when compared to steel?

Answer

- ○ No definite endurance limit
- ○ Lower thermal expansion coefficient
- ○ Higher density
- ○ Lower Ductility

2022ume1200@mnit.ac.in

Question 16.

Total Marks: 2

Reheating in a Gas turbine

Answer

- Increases the thermal efficiency
- Increases the compressor work
- Increases the turbine work
- decreases the thermal efficiency

2022ume1200@mnit.ac.in

Question 12.

Total Marks: 2

Cold working of steel is defined as working

Answer

- at its recrystallisation temperature
- above its recrystallisation temperature
- below its recrystallisation temperature
- at two thirds of the melting temperature of the metal

2022ume1200@mnit.ac.in

Question 20.

Total Marks: 2

The rated life of a bearing varies

Answer

- Directly as load
- Inversely as square of load
- Inversly as cube of load
- Inversely as forth power of load

2022ume1200@mnit.ac.in

Total Marks: 2

Question 22.

For a heat pump in the Carnot cycle, as the ratio of source to sink temperature increases, the efficiency of the cycle

Answer

- ○ Decreases
- ✓ Increases
- ○ Remains constant
- ○ First decreases then increases

2022ume1200@mnit.ac.in

Question 14.

Total Marks: 2

The isentropic efficiency of a steam turbine stage is defined as

Answer

- ○ Ratio of adiabatic enthalpy change to isentropic enthalpy change
- ○ Ratio of isentropic enthalpy change to actual enthalpy change
- ✓ Ratio of actual enthalpy change to isentropic enthalpy change
- ○ Ratio of isothermal enthalpy isentropic enthalpy change

2022ume1200@mnit.ac.in

Question 9.

Total Marks: 2

Axial thrust in a pump shaft

Answer

- Always induces tensile stresses in shaft
- Always induces compressive stresses in shaft
- Induces only bending stresses
- can induce either tensile or compressive stress

2022ume1200@mnit.ac.in

Total Marks: 2

Question 5.

The Cast iron which possess all the carbon in the combined form as cementite is known as

Answer

- ○ Grey cast iron
- ○ Spheroidal cast iron
- ○ Malleable cast iron
- ✓ White cast iron

2022ume1200@mnit.ac.in

Question 11.

Total Marks: 2

Which of the following is not a bolt locking method used

Answer

- Friction based locking
- Mechanical locking
- Tack Welding
- Adhesive locking

2022ume1200@mnit.ac.in

Question 10.

Total Marks: 2

The process of reheating the martensitic steel to reduce brittleness without any significant loss in its hardness is

Answer

- Normalising
- Annealing
- Quenching
- Tempering

2022ume1200@mnit.ac.in

Question 6.

Total Marks: 2

The example of lower pair is

Answer

- shaft revolving in a bearing
- straight line motion mechanisms
- automobile steering gear
- all of the above

2022ume1200@mnit.ac.in

Total Marks: 2

Question 7.

If there are L number of links in a mechanism then number of possible inversions is equal to

Answer

- L+1
- L-1
- L
- L+2

2022ume1200@mnit.ac.in +917834823310

2022ume1200@mnit.ac.in

Question 15.

Total Marks: 2

The von Mises stress at a point in a body is proportional to square root of

Answer

- Total strain energy per unit volume
- total plastic strain energy per unit volume
- dilation strain energy per unit volume
- distortion strain energy per unit volume

2022ume1200@mnit.ac.in

Total Marks: 2

Question 2.

Numerically controlled (NC) contouring is an example of

Answer

- [x] continuous path positioning
- [ ] point-to-point positioning
- [ ] absolute positioning
- [ ] incremental positioning

2022ume1200@mnit.ac.in +917834823310

2022ume1200@mnit.ac.in

Total Marks: 2

Question 4.

Which of the following is correct for the thermodynamic variables of gases

Answer

- ○ Cp/Cv =R
- ○ Cp+Cv= R
- ✓ Cp-Cv =R
- ○ Cv-Cp =R

2022ume1200@mnit.ac.in

Question 3.

Total Marks: 2

In which of the following pairs of cycles both cycles have at least one isothermal process

Answer

- ○ Diesel and Otto
- ✓ Carnot and Stirling
- ○ Brayton and rankine
- ○ Bell-coleman and vapour compression refrigeration cycle

Question 1. Total Marks: 2

Ratio of indicated h.p. to shaft h.p. is known as

Answer

- ○ Compressor efficiency
- ○ Isothermal efficiency
- ○ Volumetric Efficiency
- ✓ Mechanical Efficiency
